DATE OF INFO. []

SUPPLEMENT TO REPORT NO.

25X1X

1. The Massi Factory is being moved from Frantiskovy Lazne (Fransensbad - N51/P27) to the vicinity of Povazska Bystrica (Q50/071). The plant produces slide rules, micrometers, angle irons, metallic and wooden carpenters' levels, drafting instruments, and measuring tapes. Many of these products are exported.
2. The ostensible reason for relocating this plant, as publicized by the Ministry of Planning, is the desire to industrialize Slovakia. Source asserts, however, that the real reason is the plan to move plants of potential military value farther east, and the hope that further industrialization of Slovakia will increase Communist Party membership there.
3. The following is a list of equipment of the plant which has already been moved to Povazska Bystrica. The move began after 2 July 1949:
 - a. Workshop:

4 metal working lathes	2 center bench lathes
2 vertical drills	10 automatic machines for fitting ends to slide rules
2 pressure diecasting machines	1 spraying apparatus
2 grinders for slide rules	1 small gas furnace
2 large milling machines	2 tempering (or dyeing) vats
1 small milling machine	
1 new grinding machines	
 - b. Carpenter shop:

1 bandsaw	1 small cold-sawing machines
1 wood-milling machine	2 horizontal wood drills
1 wood table planer	1 wood-drying installation
1 power-feed planer for wood working	
 - c. Grinding shop:

2 two-sided grinders	1 circular table grinder
1 polishing machine	1 emery belt
